Your incurred costs listed in this column should be entered on the "Reimbursement Request" form (Total To Date Amount).

NOTES

1. Assume that of the \$66,820 requested on Request No. 1, the Fund determined \$1,000 ineligible and \$920 disallowed pending additional documentation. This means that the eligible amount for Request No. 1 was \$64,900 (\$66,820-\$1,000-\$920).
2. Enter the eligible amount (\$64,900) as "Previous Total" in the column "Amount Requested".
3. List any costs that were disallowed pending additional documentation on Request No. 1 that you feel are now eligible. In this case assume that the costs incurred by Claude Tester, \$920 was disallowed on Request No. 1. This costs is now listed on Line 1, as shown above. Be sure to submit the additional documentation to support the costs.
4. Proceed with listing the new incurred costs.

UNDERGROUND STORAGE TANK CLEANUP FUND
EXAMPLE OF A NARRATIVE WORK DESCRIPTION

Three 10,000 gallon gasoline underground storage tanks (UST) were removed by Tank Removal Services, Inc. (TRS) from our site on July 10, 1992. It was obvious that one of the tanks had leaked and contaminated the soil. It was decided after talking with the local Health Department inspector that we should excavate the soil to see if the contamination could be removed. About 400 cubic yards of contaminated soil was excavated and stockpiled on-site by TRS between July 10 and 12, 1992. At this point it was clear that the contamination had spread further than anyone suspected because of a sandy layer of soil encountered at about 20 feet.

ABC Environmental was hired on August 10, 1992 to write a workplan for a soil and groundwater investigation and disposal of the soil already excavated. The workplan was approved by the County on September 1, 1992. After soliciting three written estimates, F & P EnviroSystems was given the contract on the investigation part of the workplan because they were the low bidder and had several good recommendations from previous clients.

Three estimates were also obtained for disposing of the contaminated stockpile of soil and backfilling the excavation with clean soil as the County wanted. Soil Remediation Contractors (SRC) submitted the low bid for loading/transporting and disposing of the soil and backfilling the excavation. SRC loaded and hauled the soil to Waste Management Landfill in Summit, CA between September 2 and 6, 1992. They also brought in 577 tons of clean sand backfill. The excavation was backfilled and compacted during the same time that the soil was being taken to the landfill. F & P drilled three soil borings to 90 feet and two soil borings to 70 feet between October 9 and 12, 1992. The 90-foot borings were completed as 4-inch PVC groundwater monitoring wells (MW1-MW3) and one of the 70-foot borings was completed as a soil vapor extraction (SVE) well (VW1). Fifty-two soil samples were tested for TPHg/BTEX by Precision Chemical Laboratories (PCL). MW1-MW3 were developed October 15 and 16, 1992. Groundwater samples were taken from MW1-MW3 on October 20, 1992 and tested for TPHg/BTEX by PCL.

F & P submitted their final report to the County on November 27, 1992. Laboratory analyses showed that groundwater had not been impacted, but soil contamination existed to a depth of about 55 feet. F & P recommended drilling three additional borings to 75 feet because they had not fully defined the spread of the contamination in the northeast corner of the property and along the southern edge of the property. They also recommended that an SVE field pilot test be done so that they could design an SVE system.

F & P drilled three borings to 75 feet on January 5 and 6, 1993. Twenty-two soil samples were tested for TPHg/BTEX by PCL. An SVE field pilot test was conducted by VaporTech, Inc. on February 2, 1993 after getting three bids. F & P reported the results of the soil sampling and the pilot test to the County on March 11, 1993. F & P's report said that the entire plume of gasoline contamination had been defined. The report also included a corrective action plan (CAP) proposing SVE to clean up the soil. We are currently waiting for the CAP to be approved before obtaining three estimates for the SVE system.

* All of the work described in this document is fictitious; the names of the firms are not intended to refer to actual firms.

UNDERGROUND STORAGE TANK CLEANUP FUND
RECOMMENDED MINIMUM INVOICE COST BREAKDOWN

- I. Personnel
 - A. Name or initials of staff performing work.
 - B. Job classification or title and hourly rate.
 - C. Date and description of work performed.
 - 1. The reasons for meeting with governmental agencies should be stated on the invoice.
 - D. Hours charged for each task per day.
- II. Contractor-owned Equipment
 - A. Description of equipment and purpose of use.
 - B. Hourly/daily rate plus mobilization costs.
 - C. Dates of use and number of hours/days charged.
 - D. Purchase price if bought specifically for the project. Provide cost justification for purchase over rental/lease.
- III. Travel
 - A. Vehicle use.
 - 1. Rate per vehicle mile.
 - 2. Number of vehicle miles.
 - B. Name of individual(s) plus per-diem and other travel expenses if any.
 - C. Date and purpose of travel.
- IV. Materials
 - A. Major items such as well installation materials, pumps, treatment systems, etc. should be listed by cost per item.
 - B. Minor items which are bulked together in a lump sum should be listed also.
- V. Subcontractors, Rentals or Services Purchased by Contractor
 - A. Name and type of business.
 - B. Tasks performed and purpose of task.
 - C. Equipment used.
 - D. Subcontractor, rental or purchase invoice.
 - E. Surcharges should be explained if any.

Note: For drilling work, the invoice should show the subcontractors equipment and manpower mobilization costs, and either the hourly or per foot rate. For excavation work, the invoice should show mobilization costs and hourly rates for equipment and manpower. For soil disposal, include the name, location, and landfill fees if disposed of at a landfill. For laboratory samples and analyses include the number of samples, type of analyses, and cost per sample/analysis. All invoices should show date work performed.

- VI. Permits
 - A. Type and date of permit.
 - B. Actual cost charged by regulatory agency.
 - C. Personnel time used to obtain permit (broken down as in (I.) above).
 - D. Total cost as charged to claimant.

UNDERGROUND STORAGE TANK CLEANUP FUND
EXAMPLE OF AN INVOICE THAT MATCHES WORK PERFORMED

Invoice Period: March 30, 1993 to April 30, 1993

Labor Billing Rates

Name	Title	Rate
P. Gonzales, PE	Principal Engineer	\$95.00/hr
R. Gibbs	Staff Geologist	\$60.00/hr
K. Yan	Technician	\$39.00/hr

TASK 1 – SUBSURFACE INVESTIGATION: Work during this period included writing a workplan, preparing permits for MW4, installing one-55' groundwater well (MW4), analyzing 7 soil samples from MW4 for TPHg/BTEX, sampling and analyzing groundwater samples from MW1-MW4 for TPHg/BTEX, surveying well head elevations, measuring depths to groundwater and preparing a final report of subsurface investigation activities.

Task 1 Labor:

<u>Quantity</u>	<u>Date</u>	<u>Description</u>
Principal Engineer		
1.2	3/29	Review and correct final report
Subtotal – 1.2 hrs x \$95.00/hr = \$114.00		

Task 1 Expenses:

<u>Type</u>	<u>Item</u>	<u>Cost</u>
Fee	City Well Permit for 1 monitoring well	\$225.00

TOTAL – TASK 1 \$339.00

TASK 2 – FREE PRODUCT RECOVERY: Work during this period included selecting equipment and designing a free product recovery system, installing a product recovery pump and product separator tank, starting and adjusting product recovery system and transporting/disposing of 247 gallons of free product to UseAgain Recycling, Inc.

Task 2 Labor:

<u>Quantity</u>	<u>Date</u>	<u>Description</u>
Technician		
5.4	3/13	Install separator and shutoff switch
Subtotal – 5.4 hrs x \$39.00/hr = \$210.60		

Task 2 Expenses:

<u>Type</u>	<u>Item</u>	<u>Cost</u>
Sub	Use Again Recycling, Inc.	\$271.70

TOTAL – TASK 2 \$482.30

TASK 3 – AQUIFER PUMPING TEST: Work during this period included renting and temporarily installing pumping test equipment, conducting variable rate and constant rate pumping tests, analyzing pumping test data to determine aquifer coefficients and maximum sustainable pumping rate.

Task 3 Labor:

<u>Quantity</u>	<u>Date</u>	<u>Description</u>
Staff Geologist		
6.7	3/20	Record variable rate pumping test data
Subtotal – 6.7 hrs x \$60.00/hr=\$402.00		

Task 3 Expenses:

<u>Type</u>	<u>Item</u>	<u>Cost</u>
Exp	Mileage (72 mi x \$0.40/mi)	\$28.80

TOTAL - TASK 3 \$430.80

UNDERGROUND STORAGE TANK CLEANUP FUND
PAYMENT VERIFICATION

The FUND can only reimburse claimants who have paid or will pay for costs claimed. In order to verify that the claimant pays all costs, proof of payment must be submitted. Canceled checks are the most desirable means of doing this. The following is some helpful information regarding canceled checks.

- § Canceled checks must show bank encoding in the lower right corner.
- § If the check exceeds invoice amount provide breakdown for all invoices paid by that check.
- § The canceled checks must clearly show that the claimant paid for the costs claimed.
- § Payment to vendors must be within 30 days of receipt of Fund monies.

Example of a canceled check

Rusty Tank P.O. Box 4444 Anywhere, CA 95555	9-56781234	1220	
			Date <u>March 12, 2007</u>
PAY TO THE ORDER OF: <u>ABC Consultants Inc</u>		\$ 2,248.47	
<u>Two thousand two hundred forty-eight and 47/100</u>		<u>DOLLARS</u>	
THE BANK ANYTOWN, CA 95554			
MEMO <u>Invoice #1</u>		<u>Rusty Tank</u>	
/ 12345678/ : 1220		0001234567/ : / 0000224847/	

Bank Encoding

AP

Cashiers Checks can be submitted as proof of payment if you do not want to wait for the bank to send your canceled checks. The cashiers check should identify the claimant's name as the purchaser AND the vendor receiving the cashiers check should provide documentation of receipt.
